Welcome to Criminalistics, Inc.

Thank you for the opportunity to introduce our products and offer our follow through to show you that we care. We want you to be completely satisfied with our products and services. We understand that you, our customers, are our greatest asset and that our existence depends entirely on your satisfaction. Please tell me of your experiences with us.

Sincerely,

Robert Worsham, CEO

We are proud to direct service to over 3,000 agencies throughout the United States and Canada

Canine Products

Call Out™

Call Out™ is the newest in pager technology to keep your K-9 partner safe. Based on the proven sensor control of the Hotdog™ and the Premier Canine System™, **Call Out™** brings the communication capabilities of a cell phone to monitor the conditions inside your vehicle and notify you, should an emergency occur.

When the interior temperature of your vehicle approaches dangerous levels, the command module dials your cell phone (or a land line as backup) and gives you a voice alert, "Criminalistics Hotdog Alert!" It then presents a voice menu that allows you to respond to the situation by remote control.

Call Out™ extends the range of the Hotdog™ and the Premier Canine System™ products that have served law enforcement, military and diplomatic K-9 units for decades. When you are alerted of a temperature emergency, Hotdog™ has already lowered the windows and the optional Maxi Thin Fan™ (if installed) has already begun to move up to 480 CFM of air. With your cell phone, you can listen to the interior of the vehicle, speak to the occupants, or open the door to your K-9's enclosure to allow the dog to join you.

Bail Out™

With over 16 years of field use, Bail Out™ has earned the respect and loyalty of canine officers nationwide. Bail Out™ will immediately unlock, unlatch, push and hold open your vehicle door with the press of a single button.

Bail Out™ is individually coded for each specific vehicle to ensure that only the door with the matching code will open. With Bail Out™, your partner can be safely secured until needed.

Hotdog™

Featuring a full function display, the Hotdog™ keeps you informed of the ambient temperature in the canine compartment. The Hotdog™ has an independent electronic backup temperature sensor. This great safety feature protects your canine partner from system or operator error.

The **Portable Hotdog™** has all the features of the regular unit, plus a magnetic mount antenna, magnetic mount siren, cigarette lighter adapter plus, and a pager! This unit can easily be moved from vehicle to vehicle without permanent installation.

Premier™

The Premier Canine System™ lowers up to two electric windows when temperature in the canine compartment exceeds your programmed setting. There is a second backup temperature sensor for added protection to prevent user malfunctions. An optional pager alerts you up to 1 mile away. This system combines the Bail Out™ and the Hotdog™ into one affordable and reliable unit!

Maxi Thin Fan™

This excellent high volume ventilation fan creates airflow rates up to 480 cfm. Maxi Thin Fan™ works in conjunction with your Premier Canine System™ or Hotdog™. When the programmed temperature is exceeded, these systems will automatically alert you, lower two electronic windows and activate the Maxi Thin Fan™. As the window lowers, Maxi Thin Fan™ forces fresh air into the compartment, effectively cooling your canine companion.

Savvyfan™

This thermostatically controlled fan intelligently balances temperatures within your vehicle by circulating cool air from the passenger area to the canine compartment. Without the use of this fan, canine cage partitions will disrupt airflow between the front of the vehicle and the rear canine quarters. This creates life-threatening conditions for canine partners. The intelligent sensory circuit reads the rising temperatures, and triggers the fan as soon as the programmed temperature is surpassed.

Billing and Shipping Information

Minimum Order Requirement: \$25.00

Shipping Terms: FOB origin, we prepay shipping costs and add cost to invoice.

Payment Terms: Payment in US dollars. All domestic Governments, OPEN ACCOUNT. Invoices due upon receipt of merchandise, 1% discount if payment issued within 10 days.
