

TACTICAL THROAT MICROPHONE SYSTEM (TTMK III)

TACTICAL THROAT MICROPHONE SYSTEM (TTMK III)

The Tactical Throat Microphone System (TTMK III) was developed to provide exceptional performance and comfort for tactical applications, especially when a gas mask, respirator, and APR is deployed.

The TTMK III incorporates a microphone, high-performance black Soundwaves R4 Earcoil and choice of various Earmold or ear insert types. Also included is a Tactical Push-to-Talk (PTT) radio connection specific to the radio model selected. TTMK III systems are lightweight and low-profile in design for operators who do not want to wear a bulky headset. They are ideal for high-noise environments and provide exceptional rejection of background noise.

The TCI Tactical PTT is environmentally sealed and comes with custom sound tailoring for the radio specified, and a MOLLE compatible heavy-duty clothing clip. The TTMK III is very durable and is well-suited for operators conducting tactical missions or frequently deploying gas masks, respirators, as well as NBC, WMD, HAZMAT and Rescue personnel.

*IDEAL FOR USE WITH GAS MASK,
RESPIRATOR AND APR*

INCLUDES

- State-of-the-art throat microphone with adjustable elastic strap and safety release feature
- High-performance Soundwaves/FC R4 Earcoil (Black)
- TACT-LITE™ Earmold set (M, L and XL) or sound-attenuation ear insert
- Popular tactical Push-to-Talk (PTT) made for the specified radio model
- Dual-radio versions are also available. Custom configurations on request

****Speaker Microphone Model Determines the Proper Connection Type***

FEATURES:

- Delivers exceptional performance when gas masks, respirators and/or with NBC/WMD/HAZMAT ensembles
- Dual Communications; upgradeable with AMC connector for use with TCI "U" series advanced PTT and accessories
- Low-profile, usable with a wide array of protective face shields and ballistic helmets
- Ideal for high-noise environments, with exceptional rejection of background noise
- Over 250 different radio interfaces, including all popular military and public safety radio models, are supported
- System storage bag included
